

# Nerijus Kisieliauskas

QA Automation Engineer

nerkai@gmail.com +37061273058 Kaunas, Lithuania

linkedin.com/in/nerijuskisieliauskas nerkakiss.github.io

## Summary

QA Automation Engineer with hands-on experience building end-to-end UI and API automation frameworks using Playwright (TypeScript, Python, Java) and REST Assured. I independently design and build maintainable frameworks, using OpenCode and Playwright MCP to accelerate application exploration, implementation, debugging, and code review while manually validating all AI-assisted changes.

## Skills

### Programming Languages

Java, TypeScript, JavaScript, Python

### API Testing

REST APIs, Postman, GraphQL, JSON

### CI/CD & Version Control

GitHub Actions, Git, GitHub

### Reporting & Debugging

Allure Reports, Playwright Trace Viewer, Chrome DevTools

### AI-Assisted QA & Development

OpenCode, Playwright MCP, ChatGPT, GitHub Copilot, Claude

### Test Automation

Playwright, Selenium WebDriver, REST Assured

### Frameworks & Patterns

Page Object Model, PageManager, Fixtures, TestNG, Pytest

### Testing

E2E, API, Regression, Smoke, Functional, Positive/Negative, Data-Driven Testing

### Development Tools

Maven, Node.js, IntelliJ IDEA, VS Code, PyCharm

## Projects

2026

### DPD Shipment Automation Framework — Playwright, Java

- Built a 20-test E2E suite (5 smoke, 12 regression, 3 security) for DPD Lithuania's live shipment platform, covering login validation, shipment options, parcel locker selection, and the PUDO-to-PUDO flow up to payment.
- Selected controlled sequential execution after identifying shared account-level backend state conflicts that made parallel runs unreliable — documented the tradeoff in the project README.
- Implemented POM with PageManager, authenticated storage state, externalized test data, and JSON-driven negative scenarios.
- Integrated Maven, GitHub Actions, Allure, screenshots, traces, and retries; used OpenCode to accelerate implementation and CI troubleshooting.

2026

### DEPO E-Commerce Test Automation — Playwright, TypeScript

- Built a 32-test Playwright/TypeScript framework (15 positive, 17 negative) covering authentication, product browsing, cart, checkout, and GraphQL API validation for a live e-commerce platform.
- Implemented Page Object Model architecture with PageManager, custom fixtures, typed test data, reusable authentication setup, and GraphQL-based cart cleanup.
- Used Playwright MCP for application exploration and locator discovery, and OpenCode for implementation, debugging, and refactoring.
- Integrated GitHub Actions, Allure reporting, and tagged/parallel execution.

2026

### **LTG Link Railway Booking Automation — Playwright, Python**

- Built a 24-test suite (8 smoke, 16 regression) for LTG Link, the Lithuanian train ticket booking platform, covering authentication, route search, mobile checks, and multi-step booking flows.
- Implemented POM with PageManager, reusable date picker components, Pytest fixtures and markers, and authenticated storage state reuse.
- Added GitHub Actions nightly, smoke, and regression runs with Allure reporting, traces, videos, and retries against a live production site; used Playwright MCP selectively for flow exploration and OpenCode for debugging, refactoring, and CI troubleshooting.

2026

### **E-Commerce API Test Automation — REST Assured, Java**

- Built a 17-test modular REST Assured framework (11 positive, 6 negative) for DummyJSON, covering authentication, products, search, cart, and an end-to-end cart flow.
- Specified test scenarios and API structure for AI-assisted implementation, then manually reviewed and validated all generated tests
- Implemented request/response DTOs, reusable API and configuration layers, dynamic test data, and soft assertions for full validation.
- Configured TestNG, Maven, Allure, and GitHub Actions.

## **Professional Experience**

2026 – Present

### **Independent Projects**

QA Automation Engineer

- Designed and developed UI and API automation frameworks using Playwright, REST Assured, Java, TypeScript, and Python.
- Applied AI-assisted workflows with OpenCode and Playwright MCP for application exploration, debugging, refactoring, and CI troubleshooting.
- Built GitHub Actions CI/CD pipelines with automated reporting, failure artifacts, and smoke, regression, and nightly test execution.

2017 – 2026

### **UAB BJARNUM**

Sales Specialist

- Managed active B2B sales pipeline, supplier sourcing, and existing client relationships
- Coordinated procurement processes and identified new business opportunities across multiple product categories

2015 – 2017

### **UAB Statybų renovacijos sprendimai**

Sales Specialist

- Handled diverse product sales across various categories in a fast-paced environment

2013 – 2015

### **UAB Servea**

IT Technician

- Repaired printers and installed specialized software for business clients

2012 – 2013

### **UAB Comtech ir Co**

IT Technician

- Assembled and configured computers, installed operating systems and performed hardware/software testing before delivery
- Ensured quality standards through systematic pre-delivery testing of each unit

2009 – 2012

### **UAB Digimedia**

Programmer

- Developed and maintained game server modifications using Python and SourcePawn
- Debugged and tested custom game logic, ensuring stable and consistent player experience

## Education

2024 – 2025

### **Manual & Automation Software Testing (160h)**

Vilnius Coding School [↗](#)

Training covering manual testing fundamentals, test case creation, and bug reporting workflows. The program included extensive hands-on practice in Java-based test automation using Selenium WebDriver, with focus on building and executing automated tests.

## Certifications & Training

2026

60 hours

### **Playwright with Python - Web & API Testing** [↗](#)

Udemy

2026

70 hours

### **Playwright with TypeScript – Web & API Testing** [↗](#)

Udemy

2025

12 hours

### **Playwright Path** [↗](#)

Test Automation University by Applitools

2026

12 hours

### **JavaScript & Node.js Course for Testers, QA and SDETs** [↗](#)

Udemy

2026

24 hours

### **REST API Test Automation – Rest Assured (Java)** [↗](#)

Udemy

2026

6 hours

### **Postman API Fundamentals Student Expert**

Postman

2026

20 hours

### **BrowserStack Learning Paths — Live, App Live, Percy Visual Testing, TestNG Automation, 2026**

BrowserStack

2026

12 hours

### **Bash mastery: The complete guide to bash shell scripting** [↗](#)

Udemy

## Languages

**Lithuanian** — Native/Bilingual

**English** — Proficient

**Russian** — Conversational
